# MONARCH BLUE CHIPS CORE ETF

## FUND OBJECTIVE

The Monarch Blue Chips Core ETF (MBCC) seeks to replicate investment results that generally correspond, before fees and expenses, to the performance of the Kingsview Blue Chips Core Index (the "Index").

The Index consists of established, well-recognized large-cap companies from a broad range of industries that demonstrate strength in the marketplace based on fundamental company data such as revenue, revenue growth, net income, and net income growth. Index constituent are determined by following a proprietary rules-based methodology that scores this fundamental company data of the companies listed on the S&P 500 to determine approximately 24 of the highest-ranking companies. These companies are typically equally weighted in the Index. Based on these factors, MBCC at any given time may have a significant percentage of its assets invested in one or more sectors relative to other sectors.

## IMPORTANT RISK INFORMATION

*The Fund is new with limited operating history. Past performance does not guarantee future results. The Fund's net asset value and investment return will fluctuate based upon changes in the value of its portfolio securities. There is no assurance that the Fund will achieve its investment objective, and an investment in the Fund is not by itself a complete or balanced investment program. For a complete description of the Fund's principal investment risks please refer to the prospectus.*

*The Fund seeks positive absolute returns. Fund holdings may fluctuate in value in response to the activities of individual companies and general market and economic conditions. While the shares of ETFs are tradable on secondary markets, they may not readily trade in all market conditions and may trade at significant discounts in periods of market stress. ETFs trade like stocks, are subject to investment risk, fluctuate in market value and may trade at prices above or below the ETFs net asset value. Brokerage commissions and ETF expenses will reduce returns. There is no guarantee that the Fund will achieve its objective.*

*Equity securities are susceptible to general stock market fluctuations and to volatile increases and decreases in value. The equity securities held by the underlying ETFs may experience sudden, unpredictable drops in value or long periods of decline in value. This may occur because of factors affecting securities markets generally, the equity securities of a particular sector, or a particular company.*

*The Fund may have significant exposure to a limited number of issuers conducting business in the same sector or group of sectors. Market conditions, interest rates, and economic, regulatory, or financial developments could significantly affect a single sector or a group of sectors, and the securities of companies in that sector or group of sectors could react similarly to these or other developments.*

*The **S&P 500 Total Return Index** is the total return version of the S&P 500 Index which includes the effects of reinvested dividends. The S&P 500 Index is a capitalization weighted index of 500 stocks designed to measure performance of the broad domestic economy through changes in the aggregate market value of 500 stocks representing all major industries.*

*The index results do not reflect fees and expenses and you typically cannot invest in an index.*
